

MOROSA

SHARE SIMPLIFY SAVE

Moposa is an online wedding service, provided by your hotel that gives you the tools to make your wedding experience more enjoyable.

Moposa helps you **Share** more of the experience with your friends and family, **Simplify** the wedding planning process and **Save** time and money along the way.

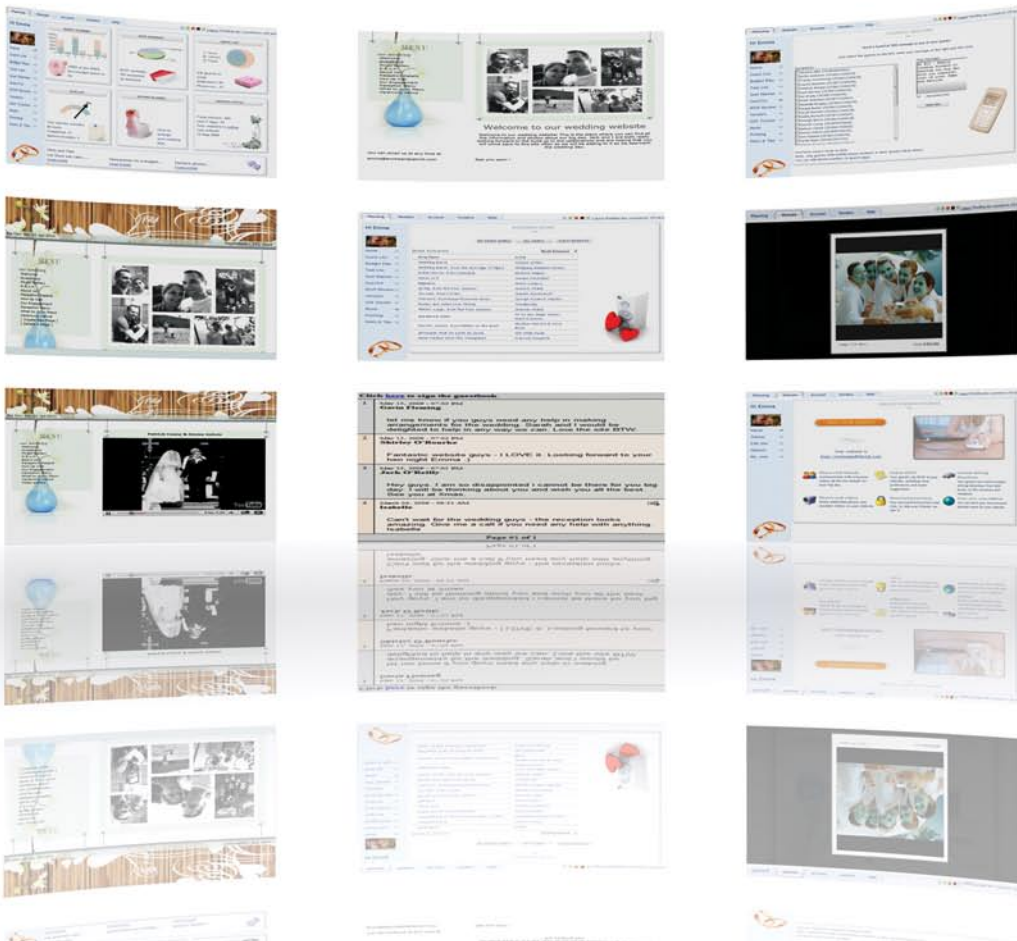

Moposa's wedding applications are fully customised to your wedding venue and are simple to use even for those with limited internet experience.

Share

What makes a wedding truly special is sharing it with your loved ones.

We understand many couples only get to spend a few brief moments with each guest on their wedding day. We want to help you connect more with your family and friends from the moment you announce your engagement until long after your wedding day.

Moposa helps you communicate more; enabling your loved ones, no matter where they are in the world, to share in your happy occasion.

Some of the Moposa tools include

- **Your own personal '.com' wedding website.** Share stories, post videos or let visitors know which tourist attractions are worth visiting in the local area.
- **Guestxt.** Create a very personal touch by sending text messages to your guests. Send messages to hundreds of friends at a time and it's all free.
- **Photo and video sharing.** Guests can upload their wedding pictures and videos after the wedding. With hundreds of guests taking thousands of pictures you won't miss any treasured memories.
- **'Save the date' evites** with colours, themes and designs that match your website.
- **Social networks.** Moposa enables you to have a wedding blog, update your wedding twitter and interact with existing social network sites such as Facebook.
- **Mobile Access.** You can even share more when you are out and about with Moposa's mobile web service and iPhone application.

Simplify

Planning your wedding is a major task and we understand you want it to go off without a hitch.

Moposa is here to take the stress and strain off managing your wedding so you can focus on enjoying every moment of the experience.

Simplifying your wedding planning does not mean making compromises – on the contrary, Moposa's technology is focused on helping you achieve more but with less effort.

Some of the Moposa tools include:

- **Guest List Manager:** Create a detailed list of all your guests. Include their addresses, email and telephone numbers if you wish to use all the other Moposa features. You can even import guests' details from sources such as Facebook, Outlook or Gmail.
- **Custom seating planner:** Save hours in deciding who sits where – with our drag-and-drop capabilities you can quickly create a reception seating plan. The room layout and tables are uniquely configured to your hotel and once you are finished you can click one button to communicate the plan to your venue. You may even want to give personal names to each table.
- **Task list:** Organise your tasks and stay on track. With a default set of task items, you can check off each one as it is completed. If our standard list doesn't cover what you need, just add your own.
- **Budget Planner:** Weddings are expensive and it is easy to spend more than you had planned. Moposa helps you set a budget and keep track of all your expenses to ensure that you don't break the bank!
- **RSVP manager:** Keep track of who is coming and who is not. When guests RSVP online their responses are automatically added.
- **Gift Tracker:** Track all the fantastic gifts you receive. Don't forget to record who you send thank you cards to.
- **Printing:** Why handwrite the addresses on your hundreds of invitations and thank you cards when you can use our one click printing instead? Personalised maps, menus and mass booklets are also available for printing.
- **Music:** Listen to hundreds of popular wedding songs and music. Watch wedding music videos and build the perfect wedding playlist.

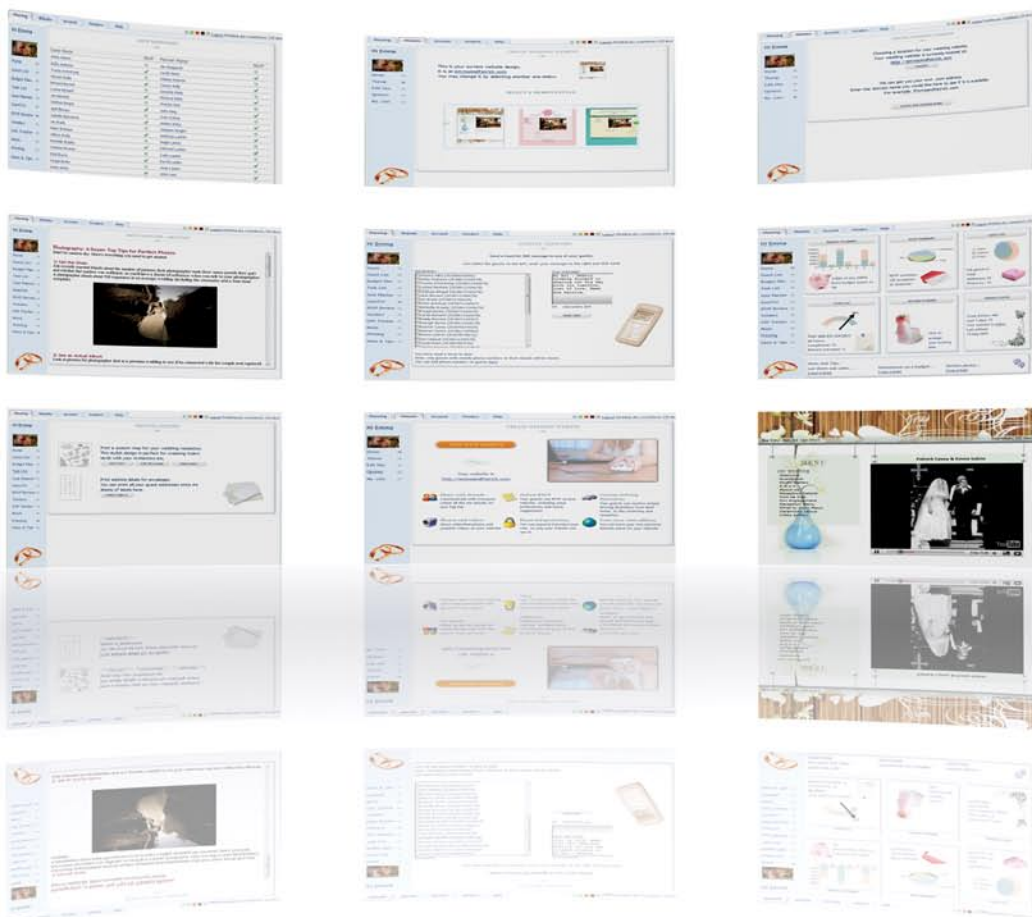

Save

Weddings are expensive no matter what your budget.

The memories you will have are priceless so we don't believe you should have to make any sacrifices when saving costs on your wedding.

Your hotel provides hundreds of Euros worth of services to you for free when they give you access to Moposa.com

Mopsoa tools that help you save

- Free wedding website with your own personal '.com'
- Free text messages to hundreds of guests*
- Free software to allow you plan, budget and deliver your wedding
- Free online storage for thousands of photos and videos from your guests*
- Instead of including hundreds of reply cards in your invitations, why not ask guests to RSVP online – it will cost nothing.
- No need to pay a printer for religious ceremony booklets. Use our online tool and develop a personalised booklet which can be printed at home and looks amazing.

* Fair usage policy applies

Hotel

Your hotel wants your wedding day to be everything you hope for and more. That is why they have partnered with Moposa to provide you with a complete set of online wedding tools. We work together with your wedding venue to make planning your wedding as simple as possible.

Our technology is fully integrated with your hotel. This means everything from when your guests book a room on your wedding website through to your seating planner is setup specifically for your hotel.

Wed 2.0

Here at Moposa we are at the forefront of what we call Wed 2.0. For us it sums up what we are all about – helping people share and simplify their wedding by utilising the latest online technologies

Web 2.0 is the popular term for internet applications that bring people together, users who generate content and easy-to-use technologies that make it all possible. Examples you may already be familiar with are Facebook, Google Apps or Youtube. One of the most significant differences between Web 2.0 and the traditional World Wide Web is greater collaboration among Internet users.

Wed 2.0 is the wedding version of Web 2.0. It is all about using the internet to connect couples with their guests and make the wedding experience simpler and more enjoyable for everyone.

Moposa created the Wed 2.0 concept and is pioneering many new advancements in the area. One such unique feature is how Moposa connects not just you and your wedding guests but also your wedding venue.

“ For us, the enjoyment of getting married could have been lost on the enormity of planning this single day. Moposa.com helped us create a unique and personal wedding but more importantly it helped us to share more of the occasion with friends and family ”

Emma & Ian Harrington.
